Citizenships: French, Canadian

Damien Échevin, an economist and research associate at the University of Sherbrooke clinical research center and at the department of economics of Laval University, has a broad range of expertise in public economics, development economics, applied econometrics, statistics and labor and health economics. He specializes in economic research and consulting to major international organizations and governments. He builds on his expertise in development economics and in the healthcare sector to help understanding and assessing the impact of policies and programs as well as major issues related to their implementation. In his carrier, he has led teams for assessment and impact evaluation purposes in various developing countries. He also conducted and carried out a dozen of evaluation surveys and survey questionnaires on various topics. By assisting public sector organizations, he aims to contribute toward the implementation of innovative interventions and efficient redistributive mechanisms, favoring human development and the autonomy of targeted poor, vulnerable or diseased populations. His publications include a variety of reports and articles in scientific reviews.
